

MAK Technologies Celebrates 30th Year Milestone with New Logo

Cambridge, MA, June 23, 2020 - MAK Technologies (MAK), a company of ST Engineering North America, celebrates its 30th year milestone with the launch of a new logo. With this new look, the company continues to position itself for future growth in the modeling and simulation industry while maintaining the longstanding values that have guided its advancement to date.

New MAK logo

Since 1990, MAK has delivered simulation, gaming, and networking technology solutions to help customers, particularly from the aerospace defense, and transportation industries, enhance their training and experimentation standards.

MAK is a wholly-owned subsidiary of its US parent company ST Engineering North America. It continues to maintain a Special Security Agreement with the US government to mitigate foreign ownership, control, and influence. Additionally, MAK is a "Non-Traditional Defense Contractor" able to enter into Other Transaction Authority (OTA) agreements pursuant to 10 U.S.C. 2371b.

"We have come a long way in the past 30 years. This milestone celebrates the achievements of everyone who has contributed to the company's success. We are very excited to launch our new logo and our new look, but as we do that, we do not forget the values that have brought us to this success. Customers always remain our priority, and we continue to deliver our highest standards of products and services that exceed expectations," said Bill Cole, President and CEO of MAK.

The new logo will be implemented with immediate effect across the company's range of products and services.

ST Engineering North America is the U.S. headquarters of ST Engineering, a global technology and engineering group, providing integrated solutions to the commercial and government markets in the aerospace, electronics, land systems, and marine sectors. Within the US, we have major operations in 17 cities across 13 states and more than 5,000 employees, providing innovative products and services across these diverse market segments. MAK Technologies develops software for live, virtual, and constructive simulation. Built upon a strong foundation of COTS products, MAK delivers simulation, gaming, and networking technology in a flexible platform to meet the requirements of training system integrators, experimentation labs, and end-users. Our primary users are in the aerospace and defense industries. Yet, our products and services can help customers anywhere modeling and simulation is needed to train, plan, analyze, experiment, prototype, and demonstrate. MAK is dedicated to serving our customers by building capable products, offering superior technical support, and innovating new ways to build, populate, and view interoperable 3D simulated worlds. MAK continues to take advantage of new technologies that further the state of simulation. Our products help users link, simulate, and visualize their world.
