MAK Technologies: Your trusted partner in training solutions

After 30 years in the modeling and simulation industry, we've made a name for ourselves as a trusted supplier of COTS simulation technology. For three decades, we've built an open, modular systems architecture that empowers our customers to choose which parts of the MAK ONE product line-up best fit their solution, in harmony with the other technology elements in their design.

MAK is now taking that same trusted, problem-solving approach into the development and delivery of training solutions.

We've always been a company that prioritizes openness, trustworthiness, and flexibility. We've added the required skill sets to deliver specific training solution capabilities to end-users and partner on bigger deals with our customers and system integrators.

What's Up MAK

MAK Legion shortlisted in the DisTec Challenge!

This interview with Len Granowetter for the DisTec Challenge covers the how's, why's, and so what's about the new MAK Legion technology — our next-generation scalability and communication framework that delivers millions of simulated entities.

Going Hybrid in 2021

2020 changed all of us. In 2021, we're using our lessons learned to offer a hybrid seminar session approach, where you'll get a better, richer MAK experience — virtually and in-person.

MAKER Spotlight: Bill Kamer

A retired infantryman and Bradley Master Gunner who served 23 years in the United States Army, Bill is our go-to subject matter expert for putting together specialized demos and training scenarios for specific customer needs.

Stay in the know!

Sign up for the MAK Live mailing list to know when you can register for our next event! Next up: the MAK ONE Seminar! Stay tuned for more details!

Pssst. Did you know?

We can customize a MAK ONE training course just for you and your team. Reach out to us at info@mak.com to learn more!
