

# What's Up **MAK**

November 2021

## Experience Multi-Domain Simulation at I/ITSEC 2021 with MAK

We're excited to be back in-person this year at the Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) – our biggest and most anticipated conference of the year!

The whole MAK team is ready to showcase our evolution as a Training Solutions provider, as well as how our MAK ONE line of COTS Modeling & Simulation products have grown over the years. We'll bring it all together to demonstrate how our MAK ONE suite of COTS products are integrated into end-user training solutions.

**[Here's what you'll experience at booth 1413 at I/ITSEC...](#)**

# MAK *live!*

Watch the MAK ONE Roadmap on  
MAKtv today!

## **Did you miss the MAK ONE Roadmap with Jim Kogler?**

We recorded it just for you. Watch the MAK Live Seminar on MAKtv for highlights from the Fall 2021 MAK ONE Release and a preview of what's to come on the road ahead.

## **Tech Tip: Controlling the Airspace**

VR-Forces is a simulation tool with capabilities that are both deep and wide, meaning that you can simulate in all domains from undersea to outer space. In this Tech Tip, we'll focus on the air domain — from optimizing the GUI for the Air Domain, to loading Airspace Coordinating Measures, to modeling Air Tasking Orders, to controlling the airspace.

## **MAKER Spotlight: Melinda Minear**

As we gear up for I/ITSEC this year, we're excited to spotlight Melinda Minear – a MAKer who has been part of the team for 21 years (and who has been to many I/ITSEC Conferences)! She wears all kinds of hats at MAK, from head trainer, to consultant, to all-around MAK Software Engineer. When she's not traveling the world to train or consult with our customers...

# MAK *is hiring!*

Got the skills? Know the perfect person?
