

What's Up **MAK**

December 2021

Whether you're jetting off somewhere special or keeping things cozy at home, we wish you peace and light this holiday season.

Here's to a bright year ahead,
Your friends at MAK

This is Epic: MAK Modeling & Simulation Testbed Receives Epic MegaGrant!

We're honored to receive this MegaGrant and will leverage this support from Epic Games to help achieve greater correlation and interoperability between MAK's products and external applications that are built on Epic's Unreal Engine.

We're celebrating Alicia Combs as MAK's new Vice President of Training Solutions!

Bringing more than 15 years of experience in program management and engineering support services, Alicia is responsible for managing MAK's entire portfolio of training solution programs, including determining strategic direction, overseeing resource coordination between programs, and managing projects and business development support.

Visit the MAK Virtual Showroom for a taste of I/ITSEC 2021 and beyond!

We know that not everyone could make it to I/ITSEC 2021 in person this year. While we can't replicate the entire I/ITSEC experience virtually, you can see our many product and Training Solutions demos in our MAK virtual showroom — take a look around and explore at your leisure! (Bonus: here's a quick video overview of our I/ITSEC demos, highlighting our focus for the year to come...)

MAKer Spotlight: Chris Gullette

Principal engineer and technical lead, poker player extraordinaire, and amateur astronomer, say hello to Chris Gullette, our final MAKer Spotlight of 2021!

MAK *is hiring!*

Got the skills? Know the perfect person?
Check out our open positions.
