MAK Fires: Individual training in the context of a multi-domain operation

MAK Fires is a comprehensive and immersive training system that provides realistic training for both Call for Fire (CFF) and Close Air Support (CAS) missions, and can be used by individual trainers at their home-station or as part of a formal CFF classroom environment. Designed by our MAK ONE experts in Cambridge and our Training experts in Orlando, MAK Fires is the perfect easy-to-use and easy-to-maintain Fires solution.

An Engineer Down the Hall Evolves

We coined the phrase “an engineer down the hall” more than 30 years ago to describe how we wanted our engineers to work with our customers. Here’s how our customer support has evolved over the years, and where it’s heading...

Applied Virtual Simulation (AVS) joins the MAK family as an official distributor!

We’re thrilled to extend our reach by adding AVS to our worldwide team of distributors to support our Australian MAK users! We’re proud to have a team of partners that have deep knowledge about our software, speak your language, and can help you build the solution you want. No matter where you are in the world, you’re never far from MAK.

MAKER Spotlight: Cyndi Krisan, Director of Business Development

We’re excited to introduce our newest MAKer, Cyndi Krisan, who joined the team in March! Based in Orlando, Cyndi is MAK’s Director of Business Development. With 35 years of experience in the simulation and training industry, Cyndi brings a wealth of first-hand knowledge to the team...
