The MAK ONE Road to Release

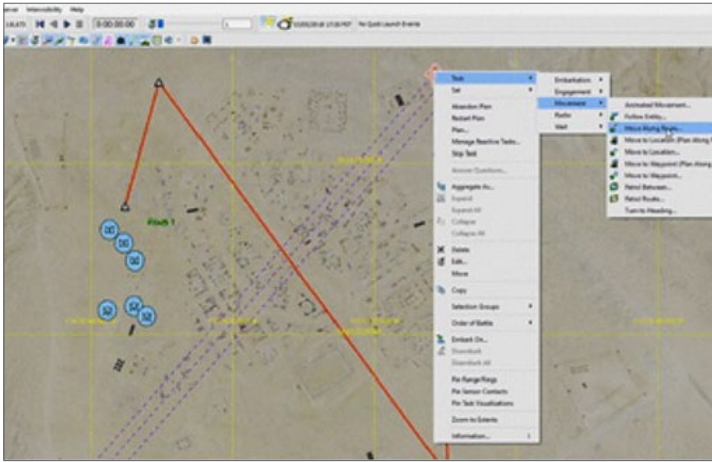

*by Jim Kogler
VP, Products*

There are big things coming to MAK ONE. From the Fall 2021 MAK ONE release, which will be announced in a few weeks, to the Spring 2022 MAK ONE release coming in March of next year, we are building on our MAK ONE tapestry to introduce a significantly modernized architecture and infrastructure.

Earlier this year, I shared the MAK ONE Tapestry story about how a mature product evolves at MAK. With each release, there are threads of capability that are wrapped up, others that continue on, and others still that are just beginning and will bring new benefits for releases to come.

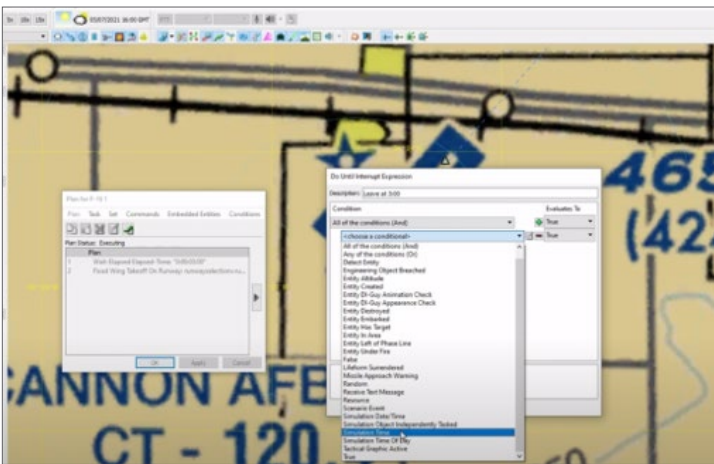

I'd like to update you on where we are today.

[Here's what's ahead on the MAK ONE Road to Release...](#)

Estimating the tactical impact of robot swarms using VR-Forces

Militaries are developing swarms of autonomous robotic Unmanned Aircraft Systems (UAS) to conduct missions that are too hazardous for human crews or expensive robotic systems. Using MAK's VR-Forces CGF, researchers at the University of Alabama in Huntsville (UAH) are conducting experiments to determine if a simulated model of a robot swarm can improve military swarm tactics. Here's how UAH is doing it.

Tech Tip: Use this new command to easily create time-based scenarios

This month's tech tip is about an elegant and powerful new feature coming to VR-Forces 4.10 in our MAK ONE Fall 2021 release. The new plan language command, Do Until Interrupt, greatly simplifies the creation of entity plans and helps automate accurate tasking relative to your preferred "interrupt" conditions.

MAK Legion Summer Update: Legion 1.1 and the SISO Study Group

A few months ago, Len Granowetter outlined our MAK Legion technology, which enables large-scale simulations that support thousands or even millions of high fidelity entities. Here's an update on where MAK Legion is today and a look at where we're taking it.

MAK is hiring!

MAKER Spotlight: Shannon Craig

We're excited to introduce to you Shannon Craig, a MAKer who started out as a MAK Engineer and recently joined the MAK Sales team as an Account Manager for North American Sales. From partnering with customers as they evaluate MAK products, to...

MAK Around the World

We're excited to get back to conferences and tradeshow over the next few months. Here's where you can find us!

- **NGAUS (August 27-30)** - We're looking forward to meeting with the National Guard Association in Las Vegas and showcase our accessible Training Solutions to warfighters.
- **DSEI (September 14-17)** - Connect with MAK and Antycip, MAK's partner and distributor, to learn more about our MAK ONE suite of simulation software at DSEI 2021 in London.
- **Maneuver Warfighter Conference (September 8-10)** - Check out our MAK Training Solutions at this show down in Columbus, Georgia.

Connect with us at info@mak.com to schedule a meeting with us at any of these events!
